UNPARALLELED QUALITY

Kaycan is a market leader because of our passion for quality which delivers exceptional value to our customers. The standards of excellence that distinguish Kaycan products include superior performance, outstanding beauty, durability and low maintenance.

All Kaycan vinyl products are made with our exclusive Duratone® Vinyl Formula, including state-of-the-art processes and the highest quality raw materials. Kaycan aluminum products are coated with an advanced Polyurethane® finish, using a proprietary two-step system for an extremely durable, low maintenance, fade-resistant paint finish. Unparalleled quality ensures superior performance in all types of environments. From 25 degrees below zero in Northern Canada and Siberia to over 110 degrees in Southern Texas, Florida and Australia.

STATE-OF-THE-ART MANUFACTURING

Kaycan is one of the world’s leading vinyl and aluminum siding and rail producers. We operate more than 5,000,000 square feet of manufacturing facilities in eleven plants and 2,500,000 square feet of distribution space in 60 locations across North America with production 24/7. Off-line weeks a year. Our rigorous quality control and testing room and moved the most stringent industry and government standards at all stages of manufacturing.

SUSTAINABLE MANUFACTURING

Kaycan leads the way in the conceptually-conscious manufacturing of quality vinyl and aluminum building products. We have implemented stringent and effective raw materials usage and energy reduction processes in our eleven manufacturing facilities, as well as environmentally-conscious programs in our distribution centers and corporate offices. These programs and processes have been successfully in helping us attain our objectives of reducing waste and energy consumption and of reusing over 95% of materials in the manufacturing process.

As an eco-conscious manufacturer, Kaycan is continually refining its business strategies and activities to meet the needs of the enterprise today, while protecting the natural resources of the future. Kaycan has developed the R+® Sustainable Manufacturing Program by recycling vinyl siding at the end of its cycle (post-consumption). Kaycan is also very proud that our products have been recognized by leading environmental green building programs. With a strong commitment to the environment and any partnerships with distinguished environmental organizations, Kaycan continues to build toward a greener future.

INNOVATION AND TECHNOLOGY

Kaycan has always been extremely committed to research and development. Being a market leader means constantly searching for new ways to provide better value to our customers. While the look and style of Kaycan products are inspired by timeless quality craftsmanship, it is modern engineering and technology that enhance overall performance, durability and ease of maintenance.
