

# ALUMINUM SIDING AND TRIMS

ENDURING PERFORMANCE

## Unsurpassed Quality Aluminum

- "Two-Coat" system includes a thermo-setting acrylic primer that is roller-coated, followed by a thermo-setting polyester (Polycoat 9000™) outside coating that is also roller-coated and baked over the primer. The "Two-Coat" system delivers an extremely durable and fade-resistant paint finish guaranteed not to flake or crack.
- Dark, rich decorative colors and complementary trims provide exceptional beauty that lasts.
- In-house aluminum coil coating ensures the best quality control.
- Complete color-coordinated range of accessories for limitless design possibilities.
- Chrome-free processes, water-conservation practices and waste minimization means full environmental responsibility far in advance of industry standards.

**Kaycan's** Aluminum Siding and Trims have long been the established standard within the industry, with a proven track record of over four decades for sturdiness, performance and beauty.

All of **Kaycan's** aluminum products are coated using a proprietary two-coat system and an advanced **Polycoat 9000™** topcoat, followed by a baked-on processing for an extremely durable and fade-resistant paint finish. **Kaycan's** coating has the lowest abrasive characteristic in the industry.

**Kaycan's** Aluminum Siding is available with both a textured or smooth finish. A complete range of color-coordinated trims and accessories are available. In addition, **Kaycan** offers the widest range of Trim Coils manufactured with the same proprietary technology for the best quality and selection.

**Kaycan** has taken full environmental responsibility far in advance of the industry with chrome-free processes, water-conservation practices and waste minimization through recycle and re-use programs.
